## 3. Lecture meeting

### 3-1. Theme

- Grand challenges in 73<sup>rd</sup> and 74<sup>th</sup> Annual meetings  
"MeaDRI"; The Capabilities and Competence of Organic Agriculture in Japan.
- The Theme in 73<sup>rd</sup> Annual meetings  
The Challenges in Diffusion of Organic Agricultural Production Technologies in Japan with "MeaDRI": Focusing on the Experiences in European Countries with "Farm to Fork"

### 3-2. Concept

The Ministry of Agriculture, Forestry and Fisheries in Japan (MAFF) launched the medium-long term strategies "MeaDRI", the plan for sustainable food system, on 12 May 2021. "MeaDRI" aims at both enhancing engagement of stakeholders at each stage of food supply chains and promoting innovation to reduce environmental burdens.

For instance, "MeaDRI" aims to achieve "50% reduction in risk-weighted use of chemical pesticides by dissemination of the Integrated Pest Management and newly-developed alternatives", "30% reduction in chemical fertilizer use", "Increase in organic farming to 1Mha(equivalent to 25% of farmland)" and so on by 2050.

On the other hand, it is likely that "MeaDRI" does not make proposal of specific methods for implementing those objectives but just expect the dissemination of smart/digital agriculture in practical use.

Anyway we have to meet specific challenges for diffusing organic agricultural production systems with learning advanced cases around European countries in order to implement "MeaDRI" for these decades. Considering the importance and urgency on these issues, ARAFE will arrange the lecture meeting on "The Expectation for MeaDRI as Propulsion Mechanism for Dissemination of Organic Farming Systems".

### 3-3. Schedule and speakers

[October 28th, 2023]

The President's address; 13:00-13:20 (Keynote lecture)

Kiichi Nakajima (Ibaraki Univ); 13:20-14:10 (Invited main lecture)

The Possibilities of Organic Farming System with "MeaDRI"; from Nature and Roots of Agricultural Perspective (Working title)

Masayasu Asai (OECD); 14:20-14:45 (Invited lecture 1)

Fostering sustainability transitions in food systems: Contributions and challenges of organic food and farming policy in the European Union (Working title)

Ken Ishikura (Ryukoku Univ); 14:45-15:10 (Invited lecture 2)

Current status of organic farming promotion and agri-environmental policy in Austria (Working title)

Simona Zollet (Hiroshima Univ); 15:10-15:35 (Invited lecture 3)

Organic farming systems and rural development in Italy – current situation and way forward (Working title)

Qs and As; 15:35-16:00

#### **4. Individual Oral Presentation**

**[October 28, 9:00-12:00 / October 29, 9:00-14:00, 16:00-17:00]**

- 4-1 The time allocated for each presentation is 30 minutes (20 minutes for presentation and 10 minutes for discussion).
- 4-2 Only one presentation can be made by one first presenter.
- 4-3 In the case of a joint presentation, in principle, the first presenter must make an oral presentation.
- 4-4 The first presenter must be a member of ARAFE and pay the 2023 annual membership fee before the application deadline (August 21, 2023).

For non-members who wish to present their papers, please request the ARAFE Secretariat to send the membership application forms as soon as possible (the application form can be downloaded from the ARAFE website).

- 4-5 For the instruction of applications, see Appendix 1. Please be careful about the submission and application methods.

#### **5. International Symposium**

##### 5-1. Theme

- 2023 International Symposium of the Association for Regional Agricultural and Forestry Economics sponsored by the Japanese Society of Organic Agriculture Science
- Scaling up Agroecology from Policies to Practices: Emerging Policies and Contradictions in the Global North

##### 5-2. Concept of the Symposium

At the Second International Symposium on Agroecology held in Rome in 2018, the United Nations (UN) initiated the Scaling Up Agroecology Initiative, to transcend the global challenges such as climate change, biodiversity loss, hunger, and social inequality. Echoing this initiative, the countries in the Global North recently launched their respective new agri-food policies aiming to transform their current food systems toward more sustainable systems. The European Green Deal, 2019 and Farm to Fork Strategy, 2020; the United States' Agriculture Innovation Agenda, 2020; and Japan's Strategy for Sustainable Food Systems

(MeaDRI), 2021 are examples of these efforts.

Although these greening policies are rapidly gaining visibility in agri-food debates, they are also highly questioned by scientists, farmers' organizations, civil society organizations because of their insufficiency, incoherency, lack of budget or support, and missing participatory approaches. The UN Food System Summit held in 2021 was a symbolic event for both countries that promoted their greening agri-food policies and the civil society organizations that boycotted and overtly criticized these initiatives.

Against this backdrop, the Association for Regional Agricultural and Forestry Economics (ARAFE) will organize two consecutive international symposia on "Scaling Up Agroecology from Policies to Practices" in 2023 and 2024. The international symposium of 2023 focuses on "Emerging Policies and Contradictions in the Global North." We have invited three speakers to analyze the greening of agri-food policies and their consequences and contradictions in the EU, the US, and Japan with interdisciplinary approaches.
